(NOTE: TV not included)

The Bud Box is a one-of-a-kind product specifically designed to grow cannabis in your living room. We know how much work is involved in researching and finding the components to grow your own cannabis. That's why we have assembled the best products (in our opinion), in one of the coolest ways to grow cannabis!

Can you imagine how awesome it is to sit with your buddies in your living room, showing off your plants? It is quite an experience to see massive colas fall out of the box as you open the door!

In the first Bud Box, I grew two plants on a 4 month cycle. Each plant yielded over a QUARTER POUND!! That's \$2000 worth of cannabis and I only had half the plants I was allowed to grow!

We supply everything except the seeds or clones... and we're working on that! Our system is the easiest way to grow cannabis. We are developing our manuals, grow charts and apps to assist you in your cannabis cultivation journey! When your Bud Box arrives, it has everything you need to grow, harvest and cure your first crop. Follow our system and you may NEVER BUY CANNABIS AGAIN!
